Assistant Professor Alvin Chan
School of Computer Science and Engineering (SCSE) NTU & Lee Kong Chian School of Medicine (LKCMedicine)

guoweialvin.chan@ntu.edu.sg

My lab's RNA focus:

1. Deep learning for Efficacy, Stability and Specificity of RNA therapeutics

Main methodologies:

1. Deep Learning:
   - Deep learning for RNA carrier design

2. High-throughput Screening:
   - Assay development for multiplex screening

Collaborative potential:

1. RNA Carrier Design for Tissue Targeting

2. RNA Payload Design Optimization
