

# Insider Threat

Organizational threats, often originating from within, involve misuse of authorized access by current or former employees, contractors, or vendors. Today, most data breaches result from deliberate or inadvertent actions by insiders.

This course explores various insider threats posed by employees, including their motivations and potential harm to organizations due to their familiarity with company processes. It also delves into strategies for defending against these threats and introduces methods for detecting and profiling insiders.

## SSG Funding support is available for this course:
