# Carpark Adviser (Mobile App)

Student: Michael Seet Boon Hock          Supervisor: Mr. Oh Hong Lye

## Project Objectives

The Carpark Adviser is a mobile application that allows drivers to search for suitable car parks near their destination using criteria such as cost, proximity, and available lots, helping them narrow down their search based on the factors that are important to them. Through this application, drivers will hopefully have a better experience finding a car park of their choosing.
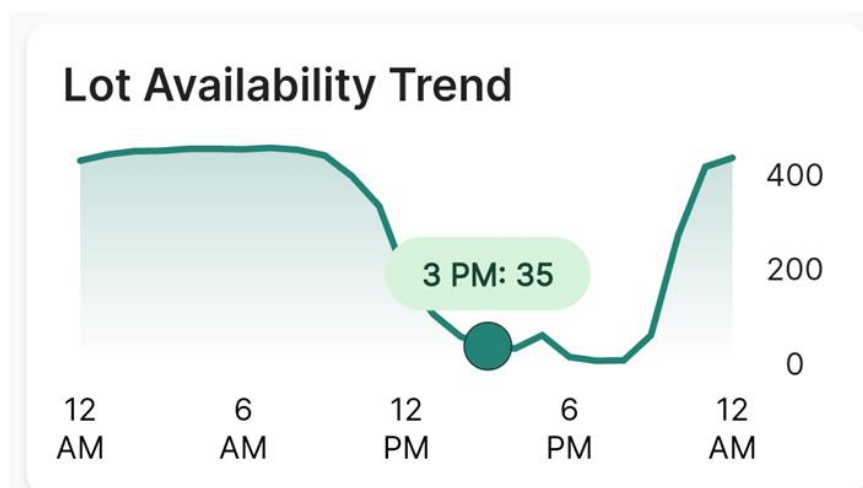

## Application Features

- Search Car Parks
- View Car Park Details
- Favourite Car Parks
- Navigation to Car Park

## Implemented With
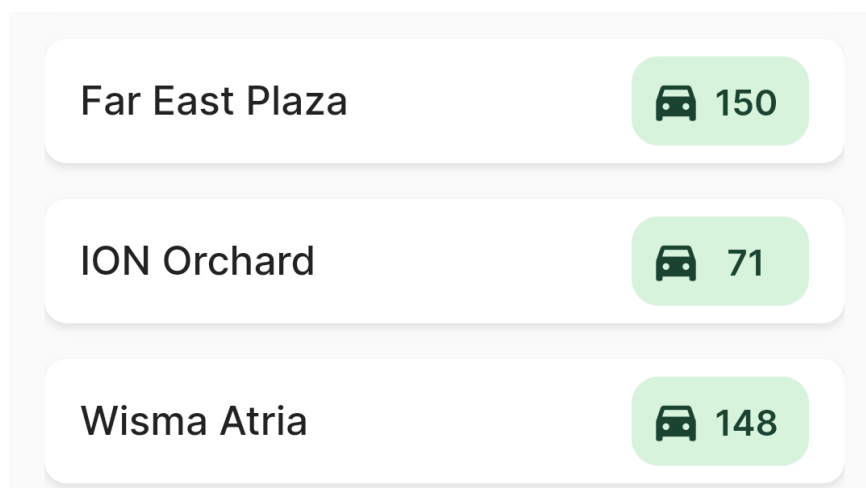

**Real-Time Lot Availability**

**Historical Lot Availability**

**Navigation to Car Park**

**Car Park Street View**

**Car Park Entrance Video**
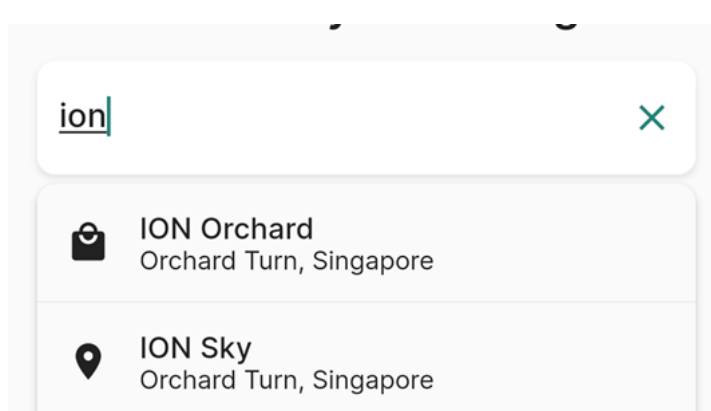

**Search by Destination**
**Filter by Criteria**

**Search Result Views**
