

Innovative Fitness Rewards System: Bridging Users & Merchants

Student: Gabriel Tang Ching Heng, Gladys Loh Hui Er Supervisor: Dr Li Fang

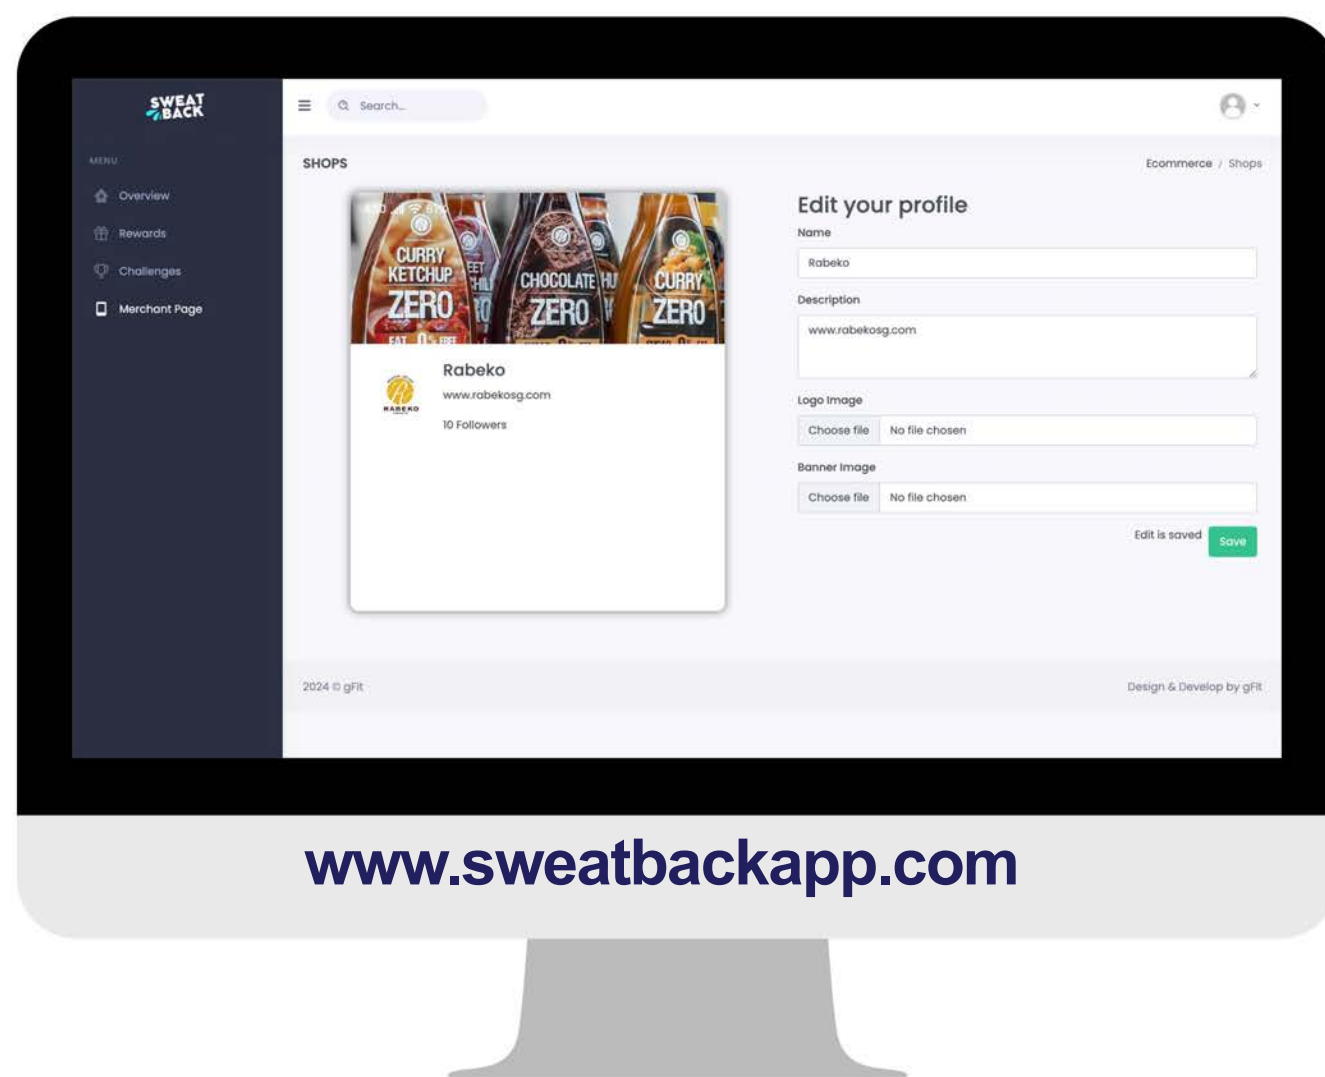

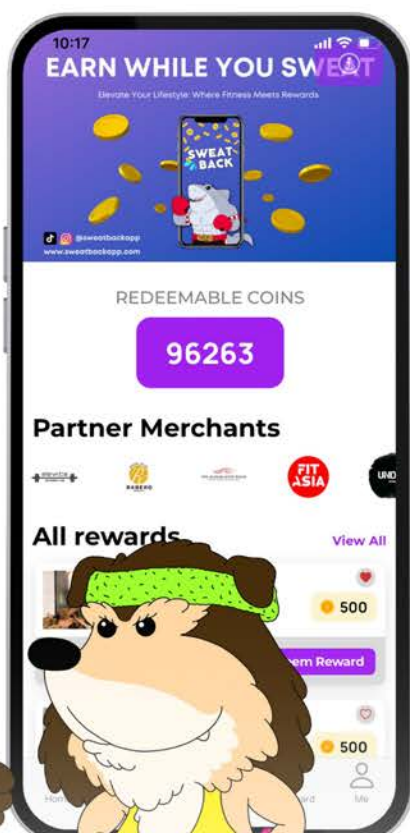

Project Objectives:

To create a sustainable ecosystem bridging users and merchants in the fitness industry. The project consists of two main features: a rewards system and an algorithm that translates health statistics into points for customized gamification. This project provides a comprehensive solution for both users and merchants, promoting healthy habits and incentives while providing valuable insights and tools for merchants.
