Project Objectives:

The project aims to develop and incorporate a recommender algorithms on recommending learning materials to students who needs help. A web-based education recommender system will be created and deployed for students and learners to access and gain personalized, unique recommendation based off their history or though similar interest.

e-Courses recommendations:

Student(s) get to access the website and gain personalized recommendation depending on their history of preferences!

Unique recommendations :

Name: Abi
Education: PhD
Age: 36
