

The Voyager

Crowdsource application for a safe travelling experience

Student: Ang Kee Wee Richie

Supervisor: Dr Owen Noel Newton Fernando

Project Objectives:

A mobile application that helps users stay informed about the dangers and safety culture of their travel destinations. With the application, users are able to identify locations that are deemed safe by other users, access local guides and obtain instant travel warnings alerts.

Technology Used:

Features:

-  **Location Safety Rating & Reviews**
 - Key hazards of each location
-  **Safe Attraction Recommender**
-  **Real-time Travel Advisory & Alerts**
 - Live emergency alert
 - Weather alert
-  **Location Based Emergency Response**
 - Emergency contact based on location
