

# ChatAlone

## Crowd Chat Application

Student: Jordan Yuen Jia Jun

Supervisor: Dr Owen Noel Fernando

### Project Objectives:

This project purpose is to create a mobile application which serves as a platform for users to be able to communicate with other users anonymously and provide a place for people who might be a little reserved or afraid to ask questions or raise feedback and allow users to create groups for discussions which helps to improve overall learning experience with the power of being anonymous at the same time providing a collaborative environment which will help improve productivity and efficiency.

### Type of Chats:

- Peer to Peer Chat
- Mesh Chat
- Group Chat
