

HZ9204/HZ204 Creative Writing: Playwriting

Course Co-ordinator: Jean Tay

This course invites students to explore the craft of playwriting through a critical understanding and practical application of basic playwriting elements such as plot, character, dialogue and so on. Students will participate in creative writing exercises as a means to finding their playwriting voice as well as honing an ear for the spoken word onstage. Critical analyses of stage play excerpts, peer critiquing of fellow students' work-in-progress scripts and a final dramatised play reading showcase will also be key components of the learning process. This course prepares students towards the completion of a shorter 5 minute play, as well as a longer final 10-15 minute stage play.
