

HH2008 Feasting and Fasting: Food and Drink in History

Academic Year: 2024-2025, S2

AU: 3 AU

Course Type: Seminar

Lecturer: Dr. Alasdair Chi alasdair.chi@ntu.edu.sg

Location and Timeslot: LHS-TR+31, LHS-B2-08 (The Hive), Fridays 1430-1720

Learning Outcomes

Upon the successful completion of this course, you would be able to:

- Explain the relationships between food and other aspects of human society and culture.
- Analyse primary sources related to the history of food and drink.
- Investigate examples of food history not explicitly covered in the module using primary and secondary sources.
- Develop creative narratives of food history and foster a constructive discussion concerning these narratives.

Course Content

This course will explore the idea that everything has a history – even habitual actions like cooking and eating and seemingly mundane foodstuffs like rice and chili. Food history challenges the boundaries of nationalist histories to demonstrate long histories of trans-cultural connections and culinary collaborations. Students will learn how food can be used as a lens to understand complex cultural, political, social, economic, and environmental phenomena.

Food history is an exciting new area of scholarship that draws on social, economic, cultural and political histories to help explain how and why practices and patterns of consumption have changed over the centuries. Food histories challenge the boundaries of nationalist histories to demonstrate long histories of trans-cultural connections and culinary collaborations. Students will learn how food can be used as a lens to study complex cultural, political, social, economic and environmental phenomena.

Seminars

This class is taught in seminar form, with one 3-hour session per week where students will be expected to participate in guided class discussions. Students should ensure they have completed the required weekly lecture reading as this forms the basis of the tutorial discussion. These tutorial readings will usually be made available via NTULearn, or links provided through the portal.

Student Assessment

The assessment for this course comprises of the following elements:

- **In-class participation:** 10%, Continuous
- **Presentation and Roundtable (Group Work):** 20%, Week 8-9; Outline in Week 7
- **Primary Source Analysis:** 25%, Week 10
- **Research Essay:** 40% After Week 13

Class Participation (10%): This includes timely reading of assignments, participating actively in small-group discussion and large-group discussions in seminar sessions and contributing to group presentations by their classmates. Failing to observe of classroom decorum (no texting, surfing, gaming) will be penalised.

Group Presentation and Roundtable (25%): Students will be split into randomised groups of 6 each beginning in Week 3, and build upon weekly class discussions to develop a roundtable topic for Weeks 8 (and 9 if necessary.) Each 10-15 minute discussion will involve a dish, historical event or personality related to the history of food and connect to the course's themes and assigned readings. The next 10-15 minutes of their presentation will involve taking questions concerning their case study from the rest of the class; class participation marks will be taken from here. All groups must submit a proposal describing their topic of choice before Recess Week, **latest by Week 7.**

To do well on the team assessment, it is necessary for you to demonstrate positive interdependence and teamwork. In principle, you will receive the same marks as your team. However, your individual score may vary based on feedback about your contributions to the group work. If students encounter issues with group members' contributions, they should speak to the instructor, who may then assess individual contributions through methods like peer evaluation.

Primary Source Analysis (25%): Students will seek out a primary source concerning the history of food and write a 1000-word essay identifying the context of this source's production, intended audience, and broader historical context. This will be due in Week 10, and an abbreviated form of this paper will form the basis of the Research Essay's literature review.

Research Essay (40%): With the help of relevant primary and secondary sources (from beyond the course materials), students are required to write a 3000-word essay on any topic related to the history of food. This assignment aims to showcase one's ability to conduct thorough research and present a coherent argument. It is essential to utilize the Chicago Manual of Style for citations and references, ensuring accuracy and adherence to academic standards. The completed essay will be due after Week 13 and must be uploaded onto Turnitin.

Office Hours

I am a part-time lecturer but will be free after class most times, and will be on campus on Thursdays as well. Just send me an email and we can plan a time around our schedules as I may be seeing multiple students. Give me one day to respond.

Bibliography and Citation Style

All citations are to be rendered in footnotes and accompanied with a complete bibliography rendered in the Chicago 16th or 17th Manual of Style. Poor citations will be marked down according to rubrics. Familiarise yourself with the difference between a footnote citation and bibliographic entry.

Plagiarism

Good academic work depends on honesty and ethical behaviour. The quality of your work as a student relies on adhering to the principles of academic integrity and to the NTU Honour Code, a set of values shared by the whole university community. Truth, Trust and Justice are at the core of NTU's shared values.

As a student, it is important that you recognize your responsibilities in understanding and applying the principles of academic integrity in all the work you do at NTU. Not knowing what is involved in maintaining academic integrity does not excuse academic dishonesty. You need to actively equip yourself with strategies to avoid all forms of academic dishonesty, including plagiarism, academic fraud, collusion and cheating. If you are uncertain of the definitions of any of these terms, you should go to the [academic integrity website](#) for more information. Consult your instructor(s) if you need any clarification about the requirements of academic integrity in the course.

GAI Usage

Use of General Artificial Intelligence (GAI) is permitted in the following situations: 1) Assist in generating key ideas only; 2) Assist in refining syntax and grammar for correct language submission only. The final write-up **MUST** be the student's own work.

Students must preserve a digital paper trail showing the way the GAI assistant was used. This should be a Word document specifying the particular GAI assistant used and include the prompts given to the GAI assistant and the GAI output, or outputs if several are generated. Use of GAI assistance is not permitted in the development or generation of this assignment or project.

On the Digital Paper Trail

Students are required, besides submitting the final work in the NTULearn facility, to also submit the paper trail as a Word document or documents, in a second and separate assignment section for this purpose under NTULearn. For assignments where the submission is non-digital, the students can create a photo journal or a blog to document the journey and submit the pdf of this instead.

This digital paper trail must be maintained for later reference, at least until the end of the Academic Year following the semester in which the relevant assignment is submitted. This is to preserve the potential evidence in case there is a later complaint or suspicion relating to academic integrity violations regarding that submission, or for further investigation by the school or other schools or the university when other academic integrity matters are raised regarding the same student, and it is deemed desirable to cross-check conduct in earlier courses.

The student must sign and submit with the assignment/project write-up a declaration regarding such use. In addition, the student must provide footnote or in-text references in the submission indicating any text paraphrase or significant fact or idea that originated with the GAI assistant.

Declaration on Academic Honesty*

Academic year and semester: AY2024-2025 Semester 1

What is academic dishonesty?

All members of the NTU community are responsible for upholding the values of academic integrity in all academic undertakings (including, but not limited to, written and oral assignments, presentations, course work, quizzes and exams). Students should not cheat, plagiarise, or attempt to pass off another's work as their own. This includes, but is not limited to, the writing or ideas of another person, without acknowledging or appropriately crediting the source from which the writing or ideas are taken. NTU takes a serious view of any form of academic dishonesty. Plagiarism, cheating, and any other forms of academic dishonesty are considered serious offences for which penalties will be imposed.

Declaration

By signing this form, you declare that you have read and understood NTU's Policy on Student Code of Conduct

(<http://www.ntu.edu.sg/ai/ForEveryone/Pages/NTUAcademicIntegrityPolicy.aspx>) and that all graded and non-graded assignments you have turned in are your/your group's own work and will not involve any plagiarism or collusion. Reliance on other people's work, when allowed, will be appropriately referenced. You are responsible for knowing the appropriate form of referencing used for this course. Quotation marks will be used around materials written verbatim from other sources; citations will clearly indicate paraphrasing of other sources. You will not submit any work for this course that was (in whole or part) graded work for another course, or will be.

You must print, sign, and return the lower section of this form to the Lecturer by Week Two. No participation credit will be given until this is returned.
