

Benchtop Centrifuge

Manufacturer: Hettich Zentrifugen

Model: Universal 320

Description

Excellent performance and comprehensive range of accessories enable them to carry out virtually any centrifuging task. Microliter tubes can be accelerated to an RCF of 21,382. At an RCF of 9,509, bacteria and yeast sediment quickly and easily. During centrifugation, the actual parameter values are indicated on the display panel. Nine acceleration and braking ramps, or unbraked run-down, can be pre-selected. The stored parameter combination remains in the memory even after the centrifuge has been switched off.

Specification and Key Advantages

- High RCF with extremely short run-up and run-down time
- User-friendliness, with 10 programmable memories
- Lid-locking and holding during rotor run
- Emergency lid-lock release
- Imbalance switch-off
