

## **UV-Vis-NIR**

**Manufacturer: PerkinElmer**

**Model: LAMBDA 950**

**Location: 02-10 Innovation wing, CREATE**

**Person in Charge: Liu Guowei**

### **Description**

This UV-Vis-NIR is used for %T/%R/%A spectra test in a wide wavelength range 175-3300 nm. The heating accessory helps to measure the %R spectra at room and high (~100 °C) temperatures.

### **Specifications and Key Advantages**

- Volts: 115/220 V
- Hz: 50/60
- Wavelength range: 175-3300 nm
- Heating accessory (ambient to 100 °C)
- PbS 150mm Large integrated Sphere
