

Assoc Prof. Daniel Lee

**Associate Professor (Practice), Carbon Markets, Division of Banking and Finance
Programme Director, Executive Certificate in Carbon Markets
Nanyang Business School, NTU Singapore**

Before transitioning to academia full-time, he spent over 17 years in industry where he undertook a variety of roles across the Energy and Decarbonization value chains, including Commodity Trading, Acquisitions & Divestments, and Capital Project Delivery.

Within the context of Carbon Markets, he first began work in 2009 by establishing Shell's Carbon Trading desk in Singapore for compliance markets in Australia and New Zealand. In 2018, he moved upstream and led several initiatives to establish nature-based carbon projects in South-East Asia, primarily focused on forest conservation. Subsequently in 2021, as part of the management team, he helped to setup Climate Impact X, a Singapore-based voluntary carbon markets exchange focused on serving corporate clients globally, where he led the successful delivery of a landmark auction program for Blue Carbon.

His current teaching focus at the Nanyang Business School is on Climate Risk and Carbon Markets.
