

Educational Research:

Positive social climate for enhancing students' Maths Self-Concept

Joint research with Elena Lui, Lam Kam Meng and Liu Woon Chia (PS)

Status: Completed in Dec 2004

The main objective is to find the attributes in the social climate which are accountable for the increase of self-concept of Secondary Two students in the Mathematics remedial classrooms in Singapore neighbourhood schools. The outcomes of this study will help teachers to improve the quality of their interaction with students and also enhance the students' self-concept in learning Mathematics.
