#### SPORT SCIENCE & MANAGEMENT SS1020 HUMAN ANATOMY AND PHYSIOLOGY

Academic Year	2024-25	Semester	1			
Course Coordinator						
Course Code	SS1020					
Course Title	Human Anatomy and Physiology					
Pre-requisites	-					
No of AUs	3					
Contact Hours	39					

# Course Aims

This course aims to introduce the various organ systems of the human body and the part that each system plays in physical performance, health, and fitness. The course is designed as a foundation course in human anatomy & physiology for students of sport science. The course will provide a strong foundation in anatomy and physiology that can be applied in future fields of sport science, including exercise physiology, sport biomechanics, motor control, sport and exercise psychology, sport injuries, health & wellness, and physical activity for special populations.

## Intended Learning Outcomes (ILO)

By the end of this course, you should be able to:

- 1. identify the major structures and functions of each human organ system.
- 2. demonstrate and explain joint movements using anatomical terminology.
- 3. identify the joint actions and muscles involved in sport or exercise movements.
- 4. articulate the role of each organ system to human performance, health, and fitness.

## Course Content

The following topics will be covered:

- 1. Organisation of the human body
- 2. Skeletal system and joints
- 3. Introduction to the skeletal muscle system
- 4. Skeletal muscle system: the upper extremities
- 5. Skeletal muscle system: the lower extremities
- 6. Skeletal muscle system: the trunk and spinal column
- 7. Nervous system: Organisation and function

- 8. Nervous system: neural control
- 9. Endocrine system.
- 10. Cardiovascular system
- 11. Respiratory system
- 12. Digestive system

## NTU Competencies & Graduate Attributes

#### **NTU Competencies**

Character	$\checkmark$
Competence	$\checkmark$
Cognitive agility	

NTU Graduate Attributes	
Graduate Attributes	Level (i.e., basic, intermediate, advanced)
1. Decision Making	Basic
2. Critical Thinking	Basic
3. Project Management	Intermediate
4. Collaboration	Intermediate

#### Assessment (includes both continuous and summative assessment)

Component	ILO Tested	Weighting	Team/ Individual	Assessment Rubrics
1. Group Presentation	1, 2, 3	30%	Team	Appendix 1, 2
2. Class Test	1, 4	20%	Individual	
3. Final Examination	1, 2, 3, 4	50%	Individual	
Total		100%		

# Formative Feedback

Feedback for learning will be verbally provided during each laboratory class session, where you have the opportunity to demonstrate anatomical and muscular movements and learn techniques and apply yourselves to problems related to each organ system.

For the presentation, you will be provided with written feedback as a group pertaining to your group's performance. Generic verbal and written feedback will be provided to the class for the test and examination.

 Learning and Teaching Approach					
Approach How does this approach support you in achieving the learning outcomes?					
Lectures	Lectures will provide information for key learning concepts and				

	theories and support understanding of key concepts
Laboratories	<ul> <li>Laboratories will:</li> <li>Give hands-on experiential learning to support key theories and information provided in class.</li> <li>Provide tasks for you to utilise what you recently learned to solve specific problems.</li> <li>Give space and time for small group activities and discussions to allow you to assimilate the content and for sharing learning.</li> <li>Allow verbal feedback from your instructor on techniques and material.</li> </ul>
Online Learning	Time will be given for learning from online materials as a part of the flip teaching approach. These materials will support key concepts covered in lectures and laboratories.

# **Reading and References**

# **NIE Research and Publications**

Nil

Other Readings and References

1. Martini FH, Nath JL & Bartholomew EF. *Fundamentals of Anatomy & Physiology*, 11<sup>th</sup> Edition, Pearson, 2018. Core text.

Please note that the core text will be available on NTULearn through Pearson's MyLab and Mastering A&P. This tool contains a suite of online learning materials to support the lectures and laboratories and to self-test your learning.

## **Course Policies and Student Responsibilities**

(1) General

You are expected to complete all assigned pre-class readings and activities, attend all classes – lecture and laboratory - punctually and, submit all scheduled assignments and take tests by due dates. You are not allowed to swap laboratory groups without express permission from the course coordinator. You are expected to take responsibility to follow up with course notes, assignments and course related announcements for sessions they have missed. You are expected to participate in all discussions and class activities unless there is a valid medical reason not to do so.

## (2) Absenteeism

Absence from class without a valid reason will affect your overall course grade. Valid reasons include falling sick, supported by a medical certificate and participation in NTU's approved activities supported by an excuse letter from the relevant bodies.

If you miss a lecture, you must inform the course instructor via email prior to the start of the class.

(3) Absence Due to Medical or Other Reasons

If you are sick and not able to complete a test or submit an assignment, you have to submit the original Medical Certificate (or another relevant document) to the Sport Science & Management (or Home School) administration to obtain official leave. Without this, the missed assessment component will not be counted towards the final grade. There are no make-ups allowed.

(4) Attire and safety

You are expected to participate in practical laboratory activities. Some of these activities involve exercise. You are expected to wear appropriate attire for participation, obey laboratory safety rules, and take appropriate care of and return all equipment after use.

#### **Academic Integrity**

Good academic work depends on honesty and ethical behaviour. The quality of your work as a student relies on adhering to the principles of academic integrity and to the NTU Honour Code, a set of values shared by the whole university community. Truth, Trust and Justice are at the core of NTU's shared values.

As a student, it is important that you recognise your responsibilities in understanding and applying the principles of academic integrity in all the work you do at NTU. Not knowing what is involved in maintaining academic integrity does not excuse academic dishonesty. You need to actively equip yourself with strategies to avoid all forms of academic dishonesty, including plagiarism, academic fraud, collusion, and cheating. If you are uncertain of the definitions of any of these terms, you should go to the <u>NTU Student</u> <u>Academic Integrity Policy and Procedures link</u> in the Student Portal for more information. Consult your instructor(s) if you need any clarification about the requirements of academic integrity in the course.

Special note: Generative AI tools will be allowed to the extent stipulated for each assignment in the assignment instructions, and any such use must be duly referenced or disclosed.

# Appendix 2: Peer Evaluation Component for Presentation

For the peer evaluation component, group members within each group will be asked to rate each of their peers, and the score received for each group member will be the average of the scores from their peers' round to the nearest integer (e.g., student gets a score of 9, 8 and 8, respectively from the 3 other group members and will receive a score of 8 (average of 8.3).

Marks	10, 9	8, 7	6, 5	4, 3	2, 1, 0
Peer Evaluation	Excellent work; was a crucial	Very strong work; contributed	Sufficient effort; contributed	Insufficient effort; met minimal	Little or weak effort; was
(10 max)	component of the group's success.	significantly to the group.	adequately to the group.	standards of the group.	detrimental to the group.

NB: Numeric scores for peer review do not necessarily align with the letter grade categories.
